

TSUNG-LING LEE

886-953-360-987 • tl265@georgetown.edu

Brief Biography

Tsung-Ling Lee is an Assistant Professor of Law with the Taipei Medical University, and a Ministry of Science of Technology Young Scholar Fellow (2019-2024). Her main research areas are in Health Law and Ethics, International Law and International Relations, Public International Law and Global Governance. Tsung-Ling obtained her Bachelor of Medical Science from the University of Sydney, and studied Law at the National Taiwan University. She then pursued a Master of laws and a Doctor of Juridical Science with a scholarship from the government and Georgetown University Law Center (Georgetown University). Tsung-Ling received her doctorate degree in 2015, her dissertation examines the proper role of government in governing non-communicable diseases, focusing on the interactions between domestic and international institutions as a function of norms dissemination. Her dissertation on Behavioral Economics and risk regulations won the Risk Policy and Law Specialty Award in 2013.

In 2015, Tsung-Ling was appointed as a Postdoctoral Fellow with Asia Research Institute, National University of Singapore. She continued her work on transnational regulatory theory and applied it to the 2014 Ebola crisis, where Tsung-Ling was invited to present her findings at the prestigious Annual American Society of International Law Research Forum. From 2015-2018, Tsung-Ling worked as a Research Fellow with the Center for Biomedical Ethics (CBmE), National University of Singapore. While at the CBmE, she led an interdisciplinary collaborative study between the University of Sydney and the National University of Singapore, the research focused on the proper role of the World Health Organization in innovative treatments, and is published in the Bulletin of the World Health Organization.

Tsung-Ling's current research includes a comparative study on the political economy of the regenerative medicine market in EU, Japan and Taiwan, examining how global market force shapes domestic biomedical innovation. Tsung-Ling other research projects include an examination of ASEAN health governance and development, focusing on the normative role of the international organization in the regional; investigation on how to govern new health security risks stemming from genome editing technology globally through the rule of law. Tsung-Ling writes on emerging domestic and international health issues, with a focus on the interplay between domestic and international norms that inform regulatory and policy decisions at national and global levels.
